MOTION BY SUPERVISOR MICHAEL D. ANTONOVICH

MARCH 9, 2004

REVISED

A bill before the Committee on Environment and Public Works of the United States Senate, SB 1716, would make funds available to small cities and jurisdictions to help them meet their Phase II Municipal Storm Water obligations. The unincorporated areas of Antelope Valley in the northern part of the County as well as the Cities of Lancaster, Palmdale, and Avalon could be the beneficiaries of such funding. The bill was introduced by Senator Chafee and is cosponsored by Senators Bond and Jeffords. Senator Boxer is on that Committee.

The unincorporated County area north of Avenue S is not included in the Los Angeles County Flood Control District and is, therefore, not eligible to receive Flood Control Benefit Assessment revenues. This lack of funding puts a strain on the area's needs to meet stormwater quality goals while maintaining vital infrastructure. In the early history of the Clean Water Act, the Federal government had a grant funding mechanism that distributed some \$500 million to upgrade publicly and privately owned sewage treatment plants. The effort resulted in a noticeable improvement in the health of the nation's waters. A similar effort to provide funds for the development and implementation of Phase II storm water quality improvements will also make a difference in cleaning up nonpoint source pollution.

I, THEREFORE, MOVE that this Board request the CAO to prepare a five-signature letter to Senators Boxer and Feinstein and the Los Angeles County Delegation supporting the passage of SB 1716 to establish grants to assist small cities and local jurisdictions in accomplishing Phase II stormwater quality goals.

**MOTION TO SUPPORT S. 1716 (CHAFEE, R-RI)—FUNDING FOR SMALL COMMUNITY
STORM WATER PROGRAMS (ITEM NO. 2, AGENDA OF MARCH 9, 2004)**

Item No. 2 on the March 9, 2004 Agenda is a motion by Supervisor Antonovich to support S. 1716 (Chafee, R-RI) and to direct the Chief Administrative Officer to send a five-signature letter to California's Senators and the County's Congressional Delegation, supporting passage of the bill.

S. 1716 would authorize states to use funds granted under Section 319 (h) of the Federal Water Pollution Control Act (33 U.S.C. 1329 [h]), for Phase II of the National Pollution Discharge Elimination System (NPDES) storm water program. Phase II is limited to small municipal separate storm sewer systems in communities with populations under 100,000, or construction sites disturbing one to five acres. The U.S. Environmental Protection Agency (EPA) issued a rule in December 1999, which established the guidelines for Phase II programs. However, Federal law and EPA regulations do not allow Section 319 funds to be used by states for Phase II project grants where the local agency holds an NPDES permit. S. 1716 would change this law and the EPA regulations.

Funding for Section 319 grants to states was only authorized for the years 1988 through 1991. Although there has been no recent authorization, the President has continued to request funding for the program and Congress has made annual appropriations. For FFY 2004, \$238,550,000 is appropriated for Section 319 programs nationwide. California's allocation is \$12.3 million, of which \$5.5 million has already been awarded to projects, with the remainder going to fund the State Water Control Board and Coastal Commission.

S. 1716 was introduced on October 3, 2003 and was assigned to the Senate Committee on Environment and Public Works. A companion bill, H.R. 3528 (Lowey, D-NY), was introduced on November 19, 2003. It was assigned to the House Committee on Transportation and Infrastructure's Water Resources and Environment Subcommittee. No action has been taken or scheduled on either bill.

Each Supervisor

Page 2

Passage of S. 1716 may provide the ability of the County's smallest communities to obtain financial assistance for storm water improvements. The Federal Legislative Agenda adopted on January 20, 2004 includes a policy supporting proposals and funding for pollution control activities, storm drain improvements, and the replacement of septic systems in the County. The motion's recommendation to send a five-signature letter in support of S. 1716 is, therefore, consistent with current Board policy.
